Disclaimer

Spirit Joy (\$TJOY) is a community-driven digital asset deployed on BNB Chain. This

document is for informational purposes only and does not constitute financial advice, investment solicitation, or guarantees of returns. Cryptocurrency investments are speculative and highly volatile. Participants should perform independent research and exercise caution.

Executive Summary

Spirit Joy (\$TJOY) is a fixed-supply meme-inspired digital asset built on BNB Chain. Designed for virality and long-term community engagement, Spirit Joy embodies energy, optimism, and unstoppable momentum. It merges the cultural power of memes with transparent tokenomics and milestone-based deflation to foster a resilient and engaged community.

The total supply of Spirit Joy is 1,000,000,000 tokens. This supply is fixed with no possibility of minting or inflation, ensuring scarcity and stability for long-term holders.

Vision

“Joy is not given. It ignites.”

Spirit Joy is built on three core pillars: energy, community, and momentum. In the fast-moving BNB Chain ecosystem, tokens thrive when they inspire identity and belonging. Spirit Joy provides a shared narrative of unstoppable flame, encouraging holders to embrace resilience and community-driven growth.

Brand Identity

Spirit Joy's symbol, the Eternal Flame, represents the inner power of the community. The central flame embodies conviction, the surrounding aura reflects collective strength, and the rising sparks signify exponential growth.

The Spirit Joy community is collectively called JoyGang, with core holders known as Flamekeepers. Together, they cultivate the culture, identity, and virality of the token.

Tokenomics

The total supply of Spirit Joy is 1,000,000,000 tokens. The token allocation is structured as follows:

- Liquidity Pool: 450,000,000 tokens, representing 45% of total supply, deployed on BNB Chain DEXs and locked for security.**

- **Community Rewards:** 200,000,000 tokens, representing 20% of total supply, used to incentivize holders, competitions, and meme campaigns.
- **Marketing and Growth:** 150,000,000 tokens, representing 15% of total supply, dedicated to viral campaigns and strategic promotions.
- **Ecosystem Development:** 100,000,000 tokens, representing 10% of total supply, reserved for partnerships, platform integrations, and utilities.
- **Team (Vested):** 50,000,000 tokens, representing 5% of total supply, vested over time to ensure alignment with the community.
- **Strategic Partnerships:** 50,000,000 tokens, representing 5% of total supply, for collaborations and exchange listings.

Burn events are milestone-based:

- **Reaching 5,000 holders triggers a 1% burn of circulating supply.**
- **Reaching 20,000 holders triggers a 2% burn.**
- **Reaching 50,000 holders triggers a 3% burn.**
- **Major exchange listing or ecosystem milestone triggers a community vote for an additional burn.**

All burns are executed publicly on-chain and permanently reduce the total circulating supply.

Liquidity and Security

All liquidity is deployed with transparency and secured through locking mechanisms.

The contract contains no hidden mint functions or unverified features. Token allocation, milestone burns, and key events are fully auditable on-chain to ensure community trust.

Roadmap

Phase One – Spark:

Token launch, liquidity deployment, early community activation, and viral meme campaigns.

Phase Two – Blaze:

Community growth initiatives, influencer collaborations, milestone burns, and holder competitions.

Phase Three – Inferno:

Staking system introduction, NFT release, and governance framework setup.

Phase Four – Eternal Flame:

DAO launch, ecosystem integrations, and strategic partnerships for long-term sustainability.

Governance

Spirit Joy aims to transition toward community-driven governance. Token holders will be able to vote on key initiatives, including burn approvals, ecosystem fund

allocations, marketing campaigns, and strategic partnerships. The community has the power to guide the future of Spirit Joy.

Risk Disclosure

Participants acknowledge that Spirit Joy is subject to high volatility, early-stage liquidity risks, meme-driven valuation fluctuations, and regulatory uncertainties. There are no guaranteed financial returns. Participation is at the individual's own risk.

Closing Statement

Spirit Joy is more than a token — it is a narrative of energy, resilience, and unstoppable momentum. In every market

cycle, some falter, but Spirit Joy's flame persists.

Markets shift. Trends change. Narratives evolve. Energy remains.
